
The Explainer Series

ROYAL FOUNDATION
**Centre for
Early Childhood**

The simple things we all do in our every day interactions with babies and young children build their sense of self, their wellbeing, and the skills that will help them to thrive throughout life.

Explore our series of seven short animations about brain development, and the impact positive early interactions can have on social and emotional development for babies and young children.

Scan the QR code to watch the films
and find out more about the series.
